CALIFORNIA PROPOSITION 65 DECLARATION

California's Safe Drinking Water & Toxic Enforcement Act of 1986, commonly known as Proposition 65 (Prop 65), requires California to publish a list of chemicals known to cause cancer, birth defects or other reproductive harm. By law, a warning must be given for listed chemicals unless the exposure is low enough to pose no significant risk of cancer or is significantly below levels observed to cause birth defects or other reproductive harm.

This is to declare that representative samples of each Arlo Technologies, Inc. product, which may have potential to expose consumers with Prop 65 chemicals, have been tested by accredited test laboratories and are currently exempt from Prop 65 requirements of clear and reasonable warning, as the exposure levels and discharges to drinking water sources are below the safe harbour levels. Arlo products are not required to carry Prop 65 warning with or on product packaging, receipt or order confirmation document.

The Prop 65 chemical list and information on safe harbour levels can be found at:
<https://oehha.ca.gov/proposition-65/proposition-65-list>;
<https://oehha.ca.gov/proposition-65/general-info/current-proposition-65-no-significant-risk-levels-nsrls-maximum>

Arlo Technologies, Inc. is committed to provide safe and high quality products to our customers. We continuously work with our vendors and supply chain partners to ensure that raw materials purchased for manufacturing of our products meet Prop 65 requirements. Arlo Technologies, Inc. will continue to monitor the Prop 65 regulation for any new chemicals and will compare newly listed chemicals with the raw materials in our finished product, and communicate this information to our customers.

Sincerely,

Doug Leong

Doug Leong
Vice President, Quality & Compliance
Arlo Technologies, Inc.
